

The Arrogance of Netanyahu and the Zionists 230731

IN THE NEWS: Netanyahu rebuffs international criticism of judicial overhaul away from democracy: 'We'll make our own decisions. FRIENDS Friends the truth is that the United States is the reason the Jews exist as a nation. The arrogant Netanyahu refuses to acknowledge this. I want to repeat that the Zionists that dictate in Israel are about to wake up in a different world after the November 2024 presidential elections in America. Israel is a postage stamp nation that without the support of the United States would not exist on the world map. The Zionism in Israel is the tail that is wagging the American dog. The Zionist future is about to be ended with a God event.

1) Let me begin by stating that the hijacked term Anti-Semitism is something the Zionist came up with in the last of the 19th century. But the term is a blatant lie when applied to Israel. The true term should be Anti-Zionism. Yes people hate the Jews more than any other race. But they do not hate all Semites like they hate the Jews. The hatred of the Jews is global within all nations. Why? Because they claim to be the Chosen People of God and therefore what ever crimes they commit again humanity is twisted into their right as God's Chosen People.

Listen, the common history of the Jews and the Muslims is Abraham. The FIRST BORN son of Abraham was Ishmael the father of the Muslim religionists and Isaac the SECOND BORN son of Abraham being the father of Judaism. Both Jews and Muslims are defined as semitic people. When you use the word anti-Semitism it applies to the Muslim equally with the Jews. AND HERE IS THE UNDENIABLE FACT: There are no people more anti-Semitic than the Jews in their relationship with the Palestinian Muslims.

2) The United States has run interference for the Jews in the United Nations Zionism policy of anti-Semitism by Zionist against Muslims since the end of WWII. The United States supports the Apartheid state of Zion (Israel) even when the United States has a global political policy of anti-Apartheid states globally; with the exception of (Zion) Israel. NOTE: I want to make it clear I am not anti-Jew. I am anti-Zionism which is just the Jewish iteration of Nazism and radical Islam. I am contra to far-right governments around the world of which Zionism is the worst. The maintain a concentration camp in Gaza for Palestinians.

3) a) Zionism has ethnically cleansed Palestine of Palestinians. There are 53 Palestinian refugee camps throughout the Middle East. b) Israel has declared a "right of return to Zion (Israel) for Jews from any country of the world. The Zionist deny a right of return to Palestinians. c) Palestinians who are a citizen of Zion, do not have

equal rights as do Jews who are a citizen of Israel. This is the classic definition of an apartheid state the most notorious example in recent history was the apartheid state of South Africa after Nazi Germany.

Friends more and more each day those who use the internet use ChatGPT to support their disagreements about everything.

THE UNIVERSAL DECLARATION OF HUMAN RIGHTS remains as relevant today as it was on the day in 1948 that it was proclaimed and adopted by the United Nations.

Query to ChatGPT. Elaborate on: Per the United Nations, "every human being has a right to citizenship in a nation".

ChatGPT response:

As of the ChatGPT last update in September 2021, ("It" Not "I") is not aware of any specific United Nations document or declaration that explicitly states that "every human being has a right to citizenship in a nation." It is crucial to note that my information might be outdated, and there may have been developments or changes after my last update.

The concept of citizenship and its granting is a matter that falls under the jurisdiction of individual countries and their respective laws and policies. While the United Nations advocates for universal human rights and principles, including the right to nationality, it does not dictate specific citizenship policies for member states.

The Universal Declaration of Human Rights (UDHR), adopted by the United Nations General Assembly in 1948, touches on the issue of nationality in Article 15. It states that "everyone has the right to a nationality" and that "no one shall be arbitrarily deprived of his nationality." This declaration emphasizes the importance of preventing statelessness and protecting individuals from being stripped of their citizenship arbitrarily.

Moreover, the 1961 United Nations Convention on the Reduction of Statelessness aims to address statelessness by providing guidelines for member states to prevent and reduce stateless situations.

While these documents emphasize the importance of nationality and the prevention of statelessness, they do not explicitly state that every human being has an inherent right to citizenship in a nation.

It is essential to refer to the latest United Nations documents and declarations for the most accurate and up-to-date information on this topic. Nationality and citizenship laws can differ significantly among countries, and they are subject to change through national legislation and international agreements.

What is the latest ChatGPT position regarding the relationship of Israel to the United Nations?

ChatGPT response:

As of my last update in September 2021, the relationship between Israel and the United Nations (UN) is multifaceted and often controversial. Since Israel's admission to the UN in 1949, the country has had a complex relationship with the international body.

On one hand, the UN has played a significant role in the establishment of Israel, as the UN General Assembly adopted the resolution to partition Palestine in 1947, which led to the creation of the State of Israel.

However, Israel has been subject to numerous resolutions by the UN, particularly by the UN Human Rights Council, that have criticized its policies and actions, especially regarding the Israeli-Palestinian conflict. This has led to criticisms of bias against Israel within the UN system.

Israel has also had a complex relationship with the UN regarding peacekeeping operations, such as the United Nations Interim Force in Lebanon (UNIFIL) and the United Nations Disengagement Observer Force (UNDOF) on the Golan Heights.

As of September 2021, Israel is a full member of the UN and participates in all its specialized agencies, though it has often faced opposition and criticism from many member states, particularly those in the Arab Group and the Organization of Islamic Cooperation.

Please note that this is a broad summary of a complex issue as of my last training data in 2021. The actual status of the relationship may have evolved or changed since then. For the most recent information, please consult the latest reliable sources or official UN reports.

The United States of America has backed the illegal acts of Israel in the United Nations. It is time that America resolved the UN issues concerning the Nation of Israel and their relationship to Palestinians (being Muslim who lived in the area the Isreal now claims as a part of Zion.

Query to "ChatGPT from Dr John WorldPeace JD, What is the position of Israel regarding the status of Palestinians (those Muslims who lived in the area that has been referred to as Palestine by the United Nations?)

ChatGPT response:

As of my knowledge cutoff in September 2021, the Israeli government's stance towards the status of Palestinians is complex and multi-faceted, and it varies significantly depending on the political group in power. Israeli policy has traditionally focused on preserving the security of the Israeli state, but this often means differing views on what should happen with the Palestinian territories and the people living there.

Generally, there are several viewpoints that exist within Israel:

- **Two-State Solution:** Some in Israel, particularly those in the center and on the left of the political spectrum, support a two-state solution where an independent Palestinian state would exist alongside Israel. This would necessitate resolving challenging issues like the status of Jerusalem, borders, and the rights of refugees.
- **One-State Solution:** There are those in Israel who advocate for a one-state solution where Israelis and Palestinians would live together within the same borders. This view is generally divided into two camps: one where this single state would be a democratic one with equal rights for all citizens, and the other where it would primarily be a Jewish state, potentially at the expense of Palestinian rights.
- **Status Quo:** There are also those who prefer maintaining the status quo, either because they don't believe a solution is possible or they believe that the status quo benefits Israel.

- **Annexation:** Some on the right side of the political spectrum argue for the annexation of Palestinian territories, particularly parts or all of the West Bank. This is highly controversial and would likely face significant international opposition.

Please note that these are broad generalizations, and individual views vary widely. Also, Israeli views on this issue are constantly evolving, and the government's stance can change depending on the political climate and who is in power.

It's important to note that any resolution to the Israeli-Palestinian conflict must be negotiated and agreed upon by both sides. Unilateral actions by either side are generally seen as counterproductive to the peace process.

For the most up-to-date information, I would suggest looking at reliable news sources that cover this topic in depth. As of now, I can provide information only until September 2021.

ISRAEL (ZION) is an apartheid state. It is not a democracy and is working to create a Theocracy like Iran in the name of Judaism.
