

The significant issues that face Americans in November 2024

My name is Dr John WorldPeace JD and I am the Independent Maverick write-in candidate for President USA 2024. Below is my position on some significant political issues.

- 1) The earth is on fire and drowning. Fossil fuels are not sustainable. Period. The move away from fossil fuels is a choice for life.
- 2) Women are second class citizens in the world human society and the Equal Rights Amendment must be passed in the USA. Only stupid women vote against it. Only stupid women vote to keep their daughters enslaved in an unbalanced world human society.
- 3) The members of the Supreme Court must fill out a detailed list of all their assets. A rule book needs to be written by congress defining prohibited gifts. Being a Supreme Court justice demands a highly restricted list of prohibited gifts and a list of those who cannot gift anything to any Federal Judge.
- 4) The courts are corrupt. Judges coming out of law school must declare their intent to become a Federal judge and once that is done, they must proceed to 5 additional years of law school focused on the requirements and prohibitions regarding being a judge. Judges cannot vote in Federal elections. They cannot ever become a member of a law firm. All their assets must reside in a trust maintained by the USA..
- 5) The electoral college must be ended and all federal politicians will be elected by popular vote. This specifically ends the gerrymandering problem that manipulated the will of the people.
- 6) There must be restrictions on who can own a gun. But guns must be available to the people in order to participate in any civil war necessary to maintain control of traitorous politicians. Children in possession of guns, creates liability for the parents. No guns for children under 12.
- 7) The fate of fetuses is a religious issue. It is not a political issue in America with separation of church and state written in the Constitution. Fetuses are potential children but until they are born, they are fetuses and have no rights. Corporate religions have the right to deny membership to anyone for any reason.
- 8) Trump is a potential convict. He should not be allowed to pursue any public office on any level until he clears his name. Any person who votes for an indicted citizen is a traitor to the United States democracy.
- 9) Slavery of Blacks and genocide of Native Americans are both evil and the United States will be tainted with its stain until there is an admission of American guilt of crimes against humanity regarding these two issues.

- 10) Corporate religion cannot shelter pedophiles. All sexual crimes must be filed under the secular law.
- 11) Books can be banned in schools up to the 9th grade. In the 9th grade children have passed through puberty and can enter into sexual conversations in schools.
- 12) The secular law can execute citizens who break the secular law.
- 13) All citizens of the United States having dual citizenships with another country, must declare their superior loyalty to the United States.
- 14) The United States does not support or do business with apartheid states. No exceptions.
